Traumatic wound: disease Fever, a limb is un- usable from rot	Physick Tear here	Physick Tear here	One of your limbs is rotting. It is unusable, as if it had suffered the CLEAVE effect, but cannot be restored until this wound is treated. You can feel the limb as it decays, alternately crawling, itching and agonizing. In addition, you are running a high fever; you have very little stamina and may suffer hallucinations. Consult a referee if you have not had this wound treated by a Physick before the end of the event.

effective, and other approaches may also work.

When you do so, the accumulated rot and death in the limb will be dumped into the patient's system. **They will suffer the VENOM effect, fall to zero hitpoints, and start to die.**

You may find it helpful to have roseweald on hand before treating this wound.

Read this card to the end before commencing treatment.

The afflicted limb has become disconnected from the patient's vital energy, and has begun to decay.

To treat this, you must reassert the connection between limb and patient by some means; acupuncture or surgery is likely to prove most
