

*Ekaterijna Nadyovna Gremani, Herald of the Council, at Anvil,  
Marchholm, Casinea,*

*I write to you urgently. You will be aware that during the liberation of Apulus over the last season, an Asavean ship was caught in harbour, belonging to one Leri Tarquinius and laden with fifteen wains of white granite. Leri was taken into custody for his own safety.*

*We have discovered that over Thursday night, a group of Grendel warriors assaulted the compound where he was being held and have made off with Leri Tarquinius, disappearing into the night. We have scouts looking, but have no idea where these Grendel are fleeing with their charge.*

*In the interim, the white granite and the vessel are still secure.*

*Please appraise the Generals of this development, and advise we will of course keep the Council informed as to any developments.*

*Regrettably, unless anyone has further intelligence on the situation, I fear will not be able to discover anything more before the end of the Solstice.*

*Yours in Loyalty,*

*Anton Ruberick von Holberg of The Towerjacks*
