

Liathaven Spy Network Report E2 2024

This physical report is an out-of-character briefing sheet, rather than an in-character report. We ask players not to share these briefings around until after the event at the earliest. It is intended to be used to create stories about what the characters involved have done since the Winter Solstice.

The total military strength of the scouts committed to Liathaven totals fifty. The only force here is serving under Dynion Stormpine.

Destruction

A month before the Winter Solstice the Jotun champion Urse Longarm launches an attack on the secretive steadings and holdfasts that make up the spy network. Any Navarr scouts who are caught are killed, those who manage to escape are able to leave the territory relatively unharmed. The spy network in Liathaven has been destroyed by the Jotun and is no longer available to support.
