

To the esteemed and Virtuous Escon who was Elisha, host of the spirit of our people,

It is with joy and Pride in my heart that I write to inform you of the success of our archaeological investigations at Chalcis Mount. As I'm sure you know, work on the sumptuous resort, sure to act as a beacon to draw in Prosperous pilgrims seeking to take in the wonders of Reikos, rebuilt and re-energised, was paused to allow exploration of some ancient finds uncovered during the digging of foundations.

The Wise Urizen experts we called in to assist have now completed their investigations, and we are hosting a little celebration in recognition of this achievement and our ability to progress with our Ambitious undertakings.

I would like to extend the offer for yourself and up to three others to join these celebrations - but I would ask that you act with discretion here and, wherever possible, invite those who might be able to provide some independent scrutiny of the finds. I cannot be sure that the Urizen are fully correct in their conclusions, and an Archivist or similar with a grounding in historical investigations would be welcome.

Similarly, since the archaeological disruptions, there have been a number of accidents reported on the site. I assure you that no harm will befall you or any other guests - we have made sure of that - but whilst the builders join the merriment, it would be apposite to turn a Vigilant eye to them as well, and ensure they are not slacking for the important work ahead.

I am assured there is a conjunction of the Sentinel Gate at 11:15pm on Friday of the Equinox - to the Dig Site in Chalcis Mount, Reikos. Please, it would be a great honour to host you those you think prudent to bring with you.

Yours in Ambition,

Jonah of Dinah's Dream
